

# VACJET: RECYCLING READY

Tank Capacity	2-Axle Truck	3-Axle Truck	4-Axle Truck
Sludge Tank Capacity (l)	4000 - 5000	8500 - 10500	10500 - 12500
Water Tank Capacity	4000 - 5000	3000 - 6000	4000 - 7000
Payload (kg)	4500	10 500	12 500
Wheelbase (mm)	5200-5700	5250-5600	6285

## Tank Superstructure

Tank in Stainless Steel Grades 3CR12

Hydraulically opening rear door with manual locks

Cyclone Filtration

Tipping System for emptying the tank

DN150 Dump Valve

DN100 De-watering valve

## Options

Tank in Recycling Ready execution

Tank in ADR-execution

Tank in high quality Stainless Steel 304/316

Hydraulic Locking Clamps for rear door

Auto-drain for cyclone filtration

Side Underrun

Side Wall covers

## Vacuum System

Jurop tri-lobe vacuum pump PVT400 with air flow rates of 2110 m<sup>3</sup>/h and a maximum vacuum of 0.85 bar.

Suction Boom, DN150, 3.6m Long, up and down function, 300° manual swivelling  
DN100 suction valve in rear door

## Options

Suction Capacity 1300/2100/3300 or 6050m<sup>3</sup>/h

Changeover valve for switch from suction to pressure mode

Telescopic suction boom, DN150, 1.35m extendable, up and down function, 300° manual swivelling

Telescopic suction boom, DN150, 1.35m extendable, up and down function, 300° hydraulic swivelling

## Operation and Control

Main control panel towards the rear of the vehicle

Reel control panel for easy operations

## Options

Wired remote with functions for suction boom, jetting hose reel.

Radio remote control

- Suction Boom Control
- Hose Reel Control
- Vacuum and high-pressure pump control
- Tank door and tipping

## High Pressure Water System

Pratissoli high pressure water pump MW45 with a jetting capacity of 269 litres per minute and maximum water pressure of 155 bar

Jetting Hose Reel with capacity of 160m 1" HD jetting hose (Supplied with 120m)

## Options

Jetting Capacity of 345 litres a minute at a pressure of 200 bar

WATER RECYCLING system with back flushing

Side Mounted Hand Reel with Capacity of 50m ½" HD jetting hose
